("Herencia" or the "Company")

Project Update - Doris Geophysical Survey

The Company is pleased to announce that Zonge Ingenieria y Geofisica (Chile) S.A. ("Zonge") has been engaged to complete the Geophysical Survey work over the high grade copper-silver 'Doris' prospect at the Company's 70% owned Paguanta Project (the "Project") in Chile.

The work is set to commence on site during the first week of January 2011 with the completion of site activity and final reporting anticipated by the end of the same month.

Zonge are familiar with the Paguanta Project having previously carried out the Geophysical surveys over both the high grade 'Patricia' veins and the 'La Rosa' porphyry-copper prospect.

Managing Director Michael Bohm stated "the geophysical information obtained from this survey will assist our Geologist in planning a drill program for Doris, which we plan to commence in 1Q2011."
